

1-add in template.blade.php

```
<div class="container">
```

```
@yield('content')
```

```
</div>
```

2-in web

```
Route::get('/students', 'StudentController@index')->name('students.index');

Route::get('/students/create', 'StudentController@create')->name('students.create');

Route::post('/students', 'StudentController@store')->name('students.store');

Route::get('/students/{student}', 'StudentController@show')->name('students.show');

Route::get('/students/{student}/edit', 'StudentController@edit')->name('students.edit');

Route::put('/students/{student}', 'StudentController@update')->name('students.update');

Route::delete('/students/{student}', 'StudentController@destroy')->name('students.destroy');

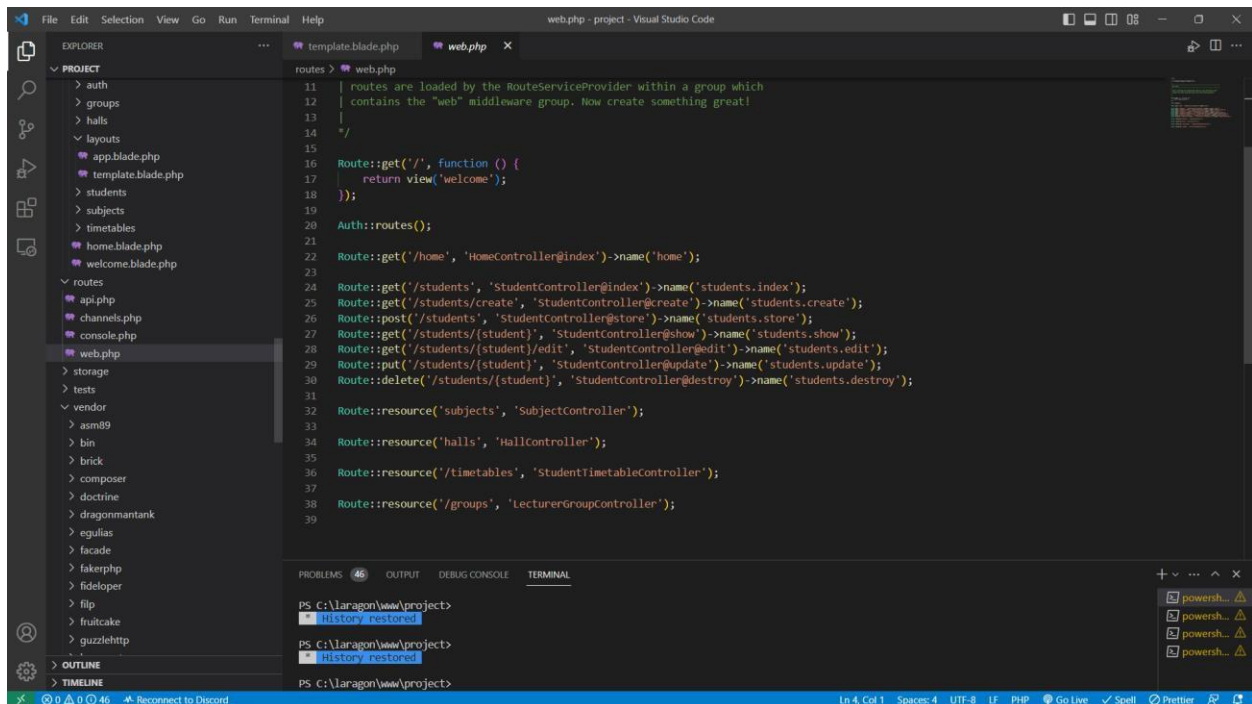

//Route::resource('students', 'StudentController');

Route::resource('/subjects', 'SubjectController');

Route::resource('/halls', 'HallController');

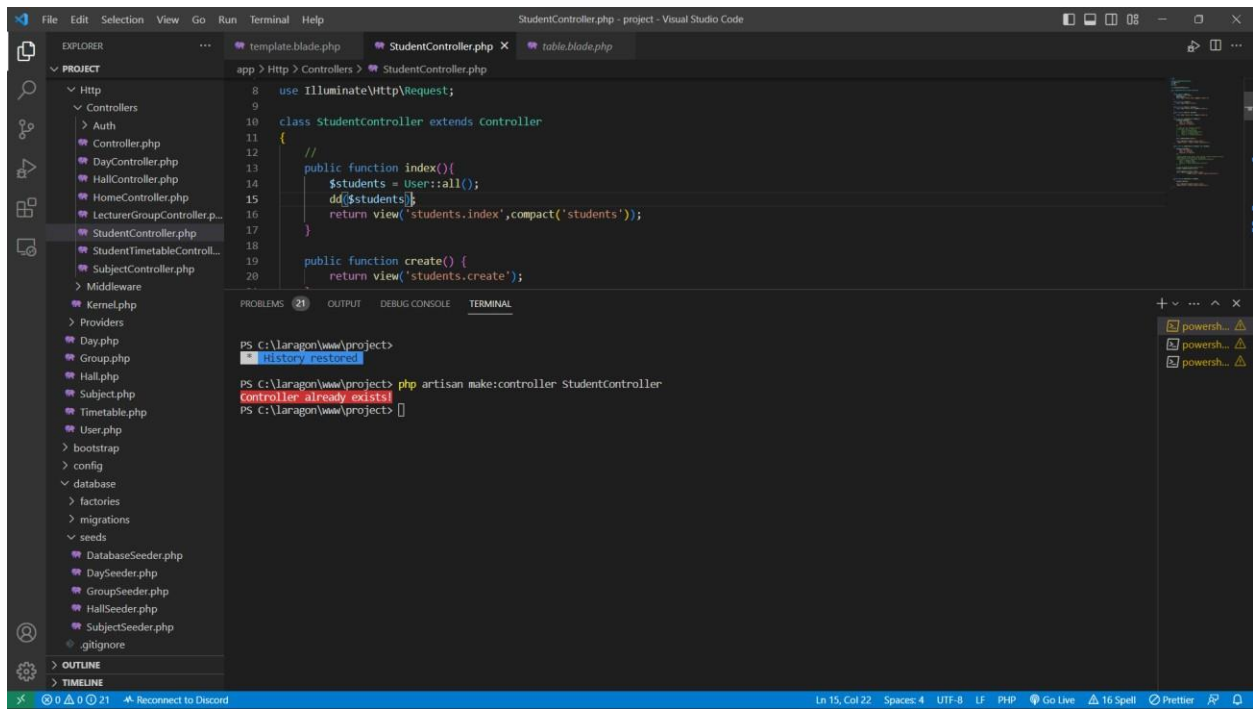

Route::resource('/timetables', 'StudentTimetableController');

Route::resource('/groups', 'LecturerGroupController');
```

3-Create StudentController

php artisan make:controller StudentController

4- Run this command untuk test wujud tak wujud

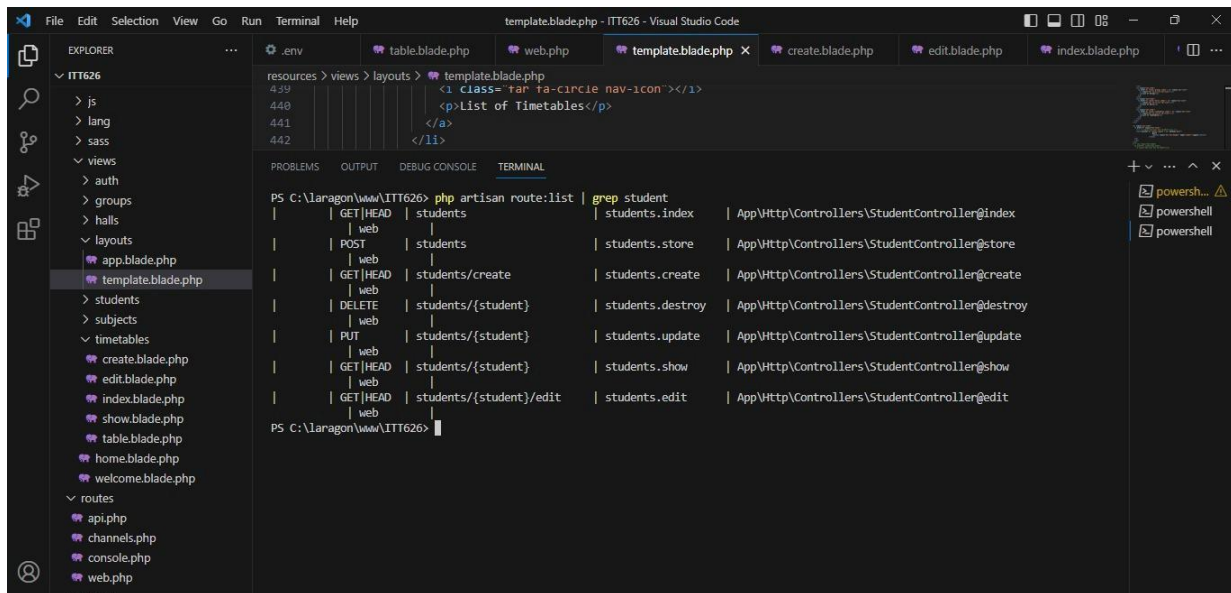

php artisan route:list

```
PS C:\Laragon\www\project> php artisan route:list
```

Domain	Method	URI	Name	Action	Middleware

5- Kalau nak details

php artisan route:list | grep student

The screenshot shows the Visual Studio Code interface with a Laravel project. The Explorer panel on the left shows the project structure, including views, layouts, and routes. The main editor displays the `template.blade.php` file. The terminal at the bottom shows the command `php artisan route:list | grep student` being executed, resulting in a table of routes.

Method	URI	Controller	Action
GET HEAD	students	App\Http\Controllers\StudentController	index
POST	students	App\Http\Controllers\StudentController	store
GET HEAD	students/create	App\Http\Controllers\StudentController	create
DELETE	students/{student}	App\Http\Controllers\StudentController	destroy
PUT	students/{student}	App\Http\Controllers\StudentController	update
GET HEAD	students/{student}	App\Http\Controllers\StudentController	show
GET HEAD	students/{student}/edit	App\Http\Controllers\StudentController	edit

6- Dalam template.blade.php

```
<li class="nav-item">
```

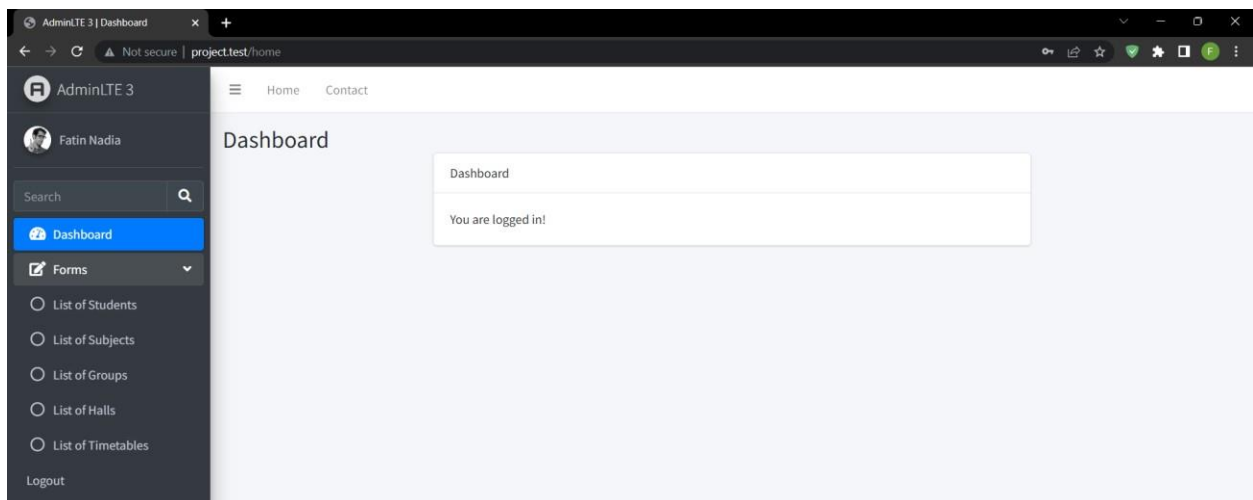

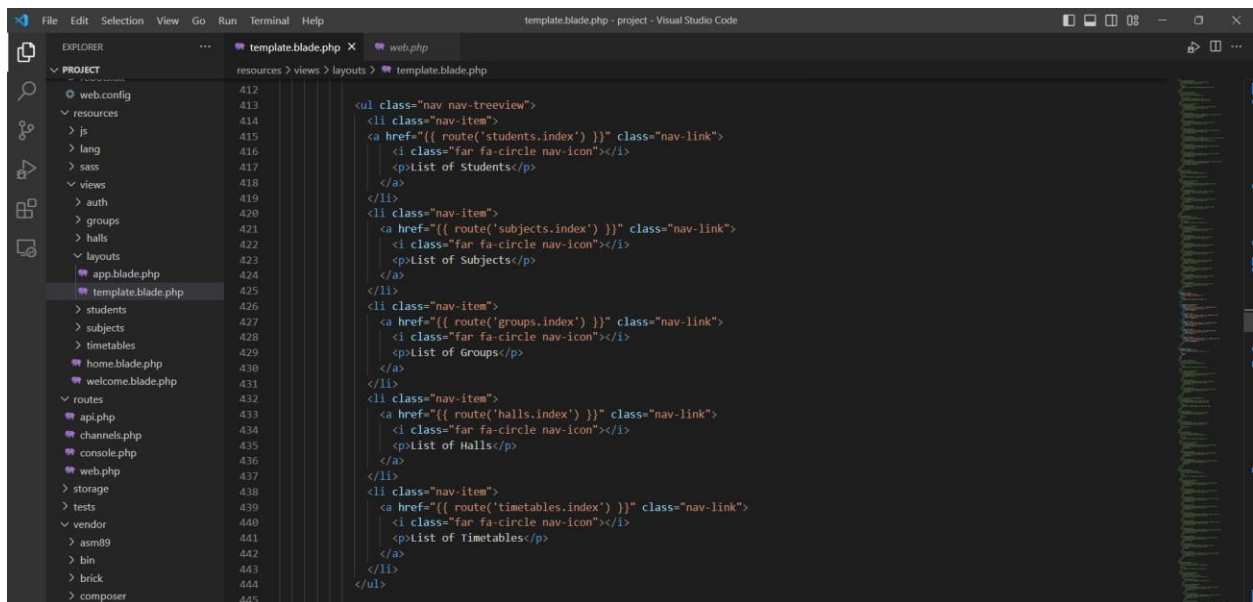

```
<a href="{{ route('students.index') }}" class="nav-link">
```

```
<i class="far fa-circle nav-icon"></i>
```

```
<p>List of Students</p>
```

```
</a>
```

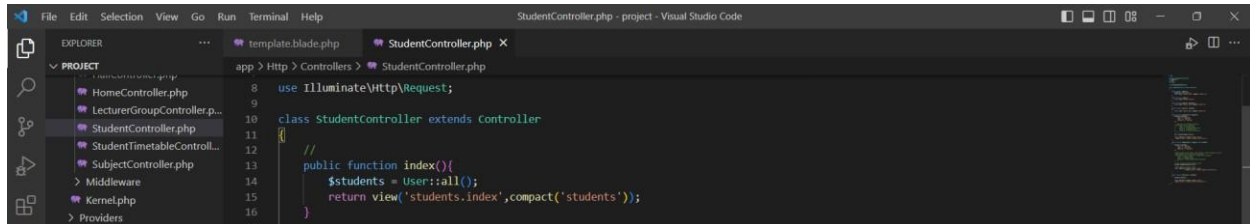

```
</li>
```

7-in student controller tambah coding ni under index

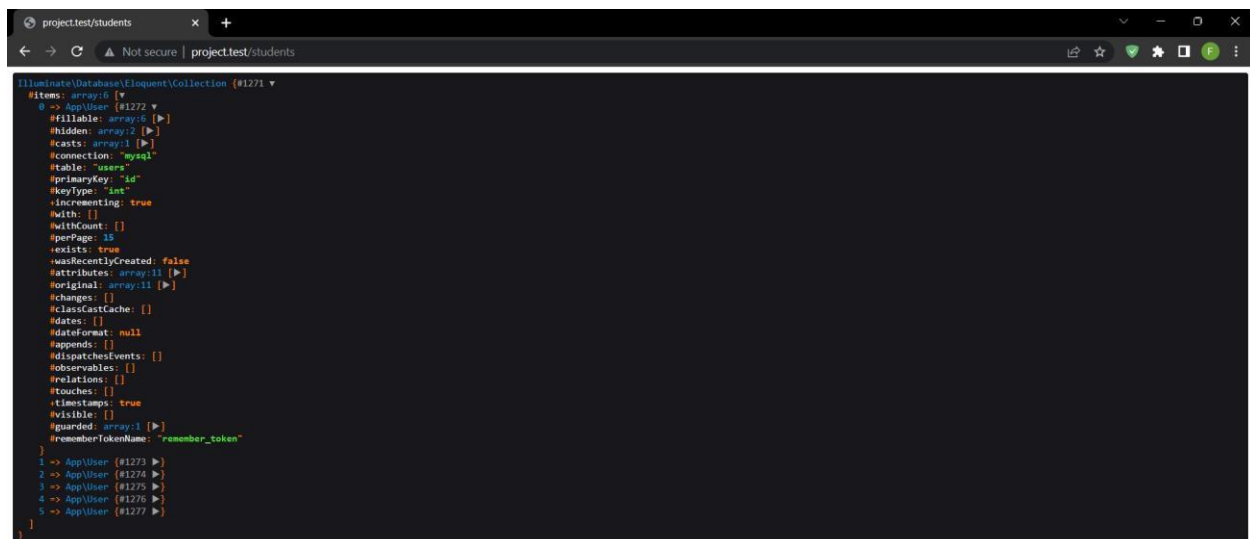

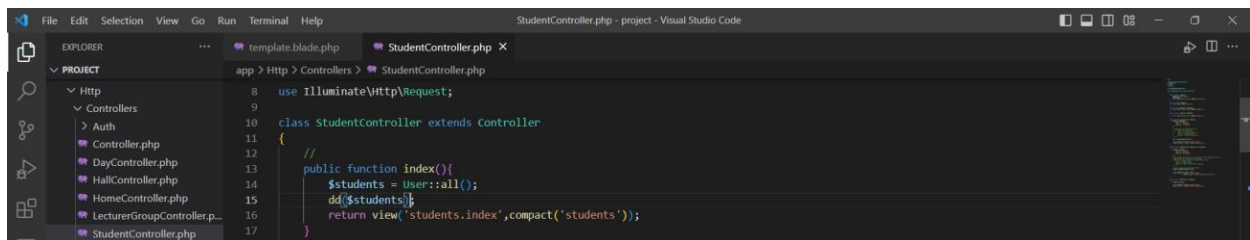

```
$students = User::all();
```

```
return view('students.index',compact('students'));
```

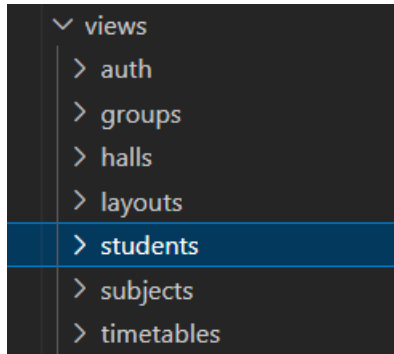

8- Untuk test data yang dapat boleh guna dd

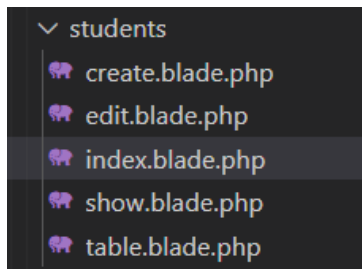

```
dd($students);
```

9-Create folder students under view

10- Create file index.blade.php

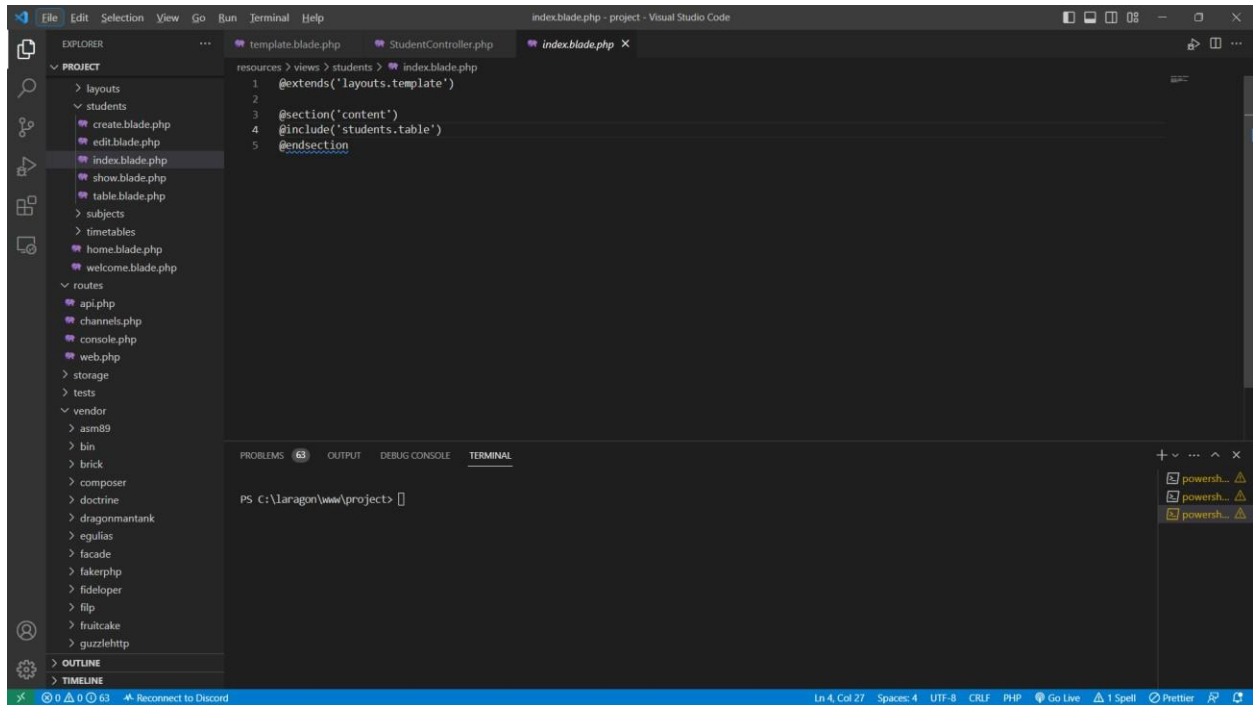

11- Paste coding bawah ni dalam index.blade.php

```
@extends('layouts.template')
```

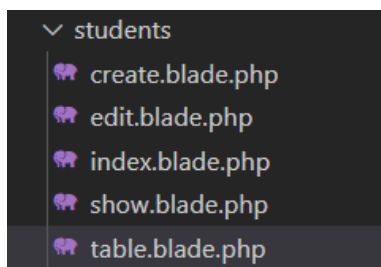

```
@section('content')
```

```
@include('students.table')
```

```
@endsection
```

12- Create file table.blade.php

13- Paste coding ni

```
@section('content')
```

```
<div class="row">
```

```
    <div class="col-lg-12 margin-tb">
```

```
        <div class="pull-left">
```

```
            <h2>List of Students</h2>
```

```
        </div>
```

```
        <div class="pull-right">
```

```
            <a class="btn btn-success" href="{{ route('students.create') }}"> Add New  
            Student</a>
```

```
        </div>
```

```
    </div>
```

```
</div>
```

```
@if ($message = Session::get('success'))
```

```
<div class="alert alert-success">
```

```
    <p>{{ $message }}</p>
```

```
</div>
```

```
@endif
```

```
<table class="table table-bordered">
```

```
    <tr>
```

```
        <th>No</th>
```

```
        <th>Name</th>
```

```
        <th>Email</th>
```

```
        <th>Joined On</th>
```

```

        <th width="280px">Action</th>

    </tr>

    @foreach ($students as $s)

    <tr>

        <td>{{ $s->id }}</td>

        <td>{{ $s->name }}</td>

        <td>{{ $s->email }}</td>

        <td>{{ $s->created_at }}</td>

        <td>

            <form action="{{ route('students.destroy',$s->id) }}" method="POST">

                <a class="btn btn-info" href="{{ route('students.show',$s->id) }}">Show</a>

                <a class="btn btn-primary" href="{{ route('students.edit',$s->id) }}">Edit</a>

                @csrf

                @method('DELETE')

                <button type="submit" class="btn btn-danger">Delete</button>

            </form>

        </td>

    </tr>

    @endforeach

</table>

@endsection

```

```
1 @section('content')
2 <div class="row">
3     <div class="col-lg-12 margin-tb">
4         <div class="pull-left">
5             <h2>List of Students</h2>
6         </div>
7         <div class="pull-right">
8             <a class="btn btn-success" href="{{ route('students.create') }}"> Add New Student</a>
9         </div>
10    </div>
11 </div>
12 @if ($message = Session::get('success'))
13     <div class="alert alert-success">
14         <p>{{ $message }}</p>
15     </div>
16 @endif
17 <table class="table table-bordered">
18     <tr>
19         <th>No</th>
